

ShopSphere

Exchange Policy

Demo company knowledge document for the RAG customer-support chatbot.

1. Exchange Window

Eligible products may be exchanged within 15 calendar days from the date of delivery.

The exchange request must be submitted through the ShopSphere Orders section. The customer should select the order, choose the item, and select the reason for exchange.

2. Eligibility

Products must be unused, unworn, and in their original condition. Original tags, accessories, manuals, and packaging should be included whenever applicable.

Products damaged because of customer misuse, alteration, washing, or improper handling may not qualify for exchange.

Some products may be marked as non-exchangeable on the product page. Such products are not eligible even if the request is made within 15 days.

3. Size or Color Exchange

For eligible clothing and footwear, customers may request a different available size or color. The requested replacement must be available in inventory.

If the requested replacement is unavailable, the customer may be offered a refund according to the applicable refund policy.

4. Exchange Process

After an exchange request is submitted, ShopSphere reviews the request. Approved items are collected by the delivery partner.

The replacement item is dispatched after the returned item passes the required inspection. Delivery time depends on the destination and inventory availability.

5. Important Restrictions

Exchange requests cannot be transferred from one order to another. One exchange request applies only to the specified item.

Products purchased during certain clearance or final-sale promotions may be excluded from exchange when the product page states so.

Document status: Demo policy. This document is intended only for testing the RAG application.
