

ShopSphere

Orders & Account Help

Demo company knowledge document for the RAG customer-support chatbot.

1. Placing an Order

Customers can place an order by adding an eligible product to the cart, entering delivery details, selecting a payment method, and confirming the order.

An order confirmation is sent after successful order placement. The order number should be retained for support requests.

2. Order Status

Customers can view the current order status from the Orders section of their ShopSphere account.

Common statuses include Confirmed, Processing, Packed, Shipped, Out for Delivery, Delivered, Cancelled, and Return Requested.

3. Changing Delivery Details

A delivery address can be changed only while the order is still eligible for modification. Once an order has been shipped, the address generally cannot be changed through customer support.

If the address is incorrect after shipment, the customer should contact support with the order number. The support team will check whether any carrier-level change is possible.

4. Cancellation

An order may be cancelled before it enters the shipping stage, subject to the order status.

If an order has already shipped, cancellation may not be available. The customer may instead use the applicable return or refusal process after delivery.

5. Account Problems

If a customer cannot sign in, they should use the password-reset option associated with their registered email address.

Customers should never share passwords, one-time passwords, card PINs, or complete payment credentials with support representatives.

6. Missing or Incorrect Order

For a missing, damaged, or incorrect item, the customer should report the issue through the Orders section as soon as possible and provide photographs when requested.

Support may request the order number, item name, delivery date, and a description of the issue before reviewing the case.

7. Updating Profile Details

Customers who are signed in can update their profile details from the Profile section of their ShopSphere account. Profile changes apply to the account itself and do not modify orders that have already been placed; delivery details for existing orders follow the process in Section 3.

The customer's name can be changed at any time and the update takes effect immediately. The name shown on completed orders and refunds remains unchanged for record-keeping purposes.

The email address can be changed by entering the new address in the Profile section and confirming the verification link sent to it. The change takes effect only after the new address has been verified, and a confirmation notice is sent to the previous address. For security reasons, ShopSphere support cannot change the email address on a customer's behalf. Order confirmations and account notifications are sent to the currently verified email address.

The phone number stored in the profile is used as the default contact number for delivery updates. It can be changed at any time, takes effect immediately, and can be overridden per order at checkout. Changing the profile phone number does not affect orders that have already been placed.

The password can be changed while signed in from the Profile section by entering the current password and the new password twice. The new password takes effect immediately, and other active sessions are signed out as a security measure. A customer who cannot sign in should use the password-reset option described in Section 5 instead.

Document status: Demo policy. This document is intended only for testing the RAG application.
