

ShopSphere

Payment & Refund Policy

Demo company knowledge document for the RAG customer-support chatbot.

1. Accepted Payment Methods

ShopSphere supports major debit cards, credit cards, UPI, and selected online payment methods shown during checkout.

Payment options may vary by order, location, and transaction eligibility.

2. Payment Failure

If money is debited but the order is not confirmed, the payment may be automatically reversed by the payment system.

Customers should avoid making repeated payments for the same order while a previous transaction is still being processed. They should first check the Orders section and their payment statement.

3. Refund Eligibility

Refunds are issued when an order or eligible item qualifies for a refund under the applicable cancellation, return, exchange, or damaged-item policy.

The final refund amount may depend on the amount actually paid, eligible charges, discounts, and the specific policy applicable to the order.

4. Refund Processing Time

After ShopSphere approves a refund, the refund is initiated within 2 business days.

After initiation, the time taken for the amount to appear in the customer's account depends on the payment provider or bank.

5. Refund for Prepaid Orders

For an approved refund on a prepaid order, the amount is normally returned to the original payment method.

If the original payment method cannot receive the refund, ShopSphere may request additional information or provide an alternative refund procedure.

6. Partial Refunds and Charges

A refund may be lower than the original order value when certain charges, non-refundable fees, or promotional conditions apply.

Customers should refer to the order-specific refund information shown during the support process.
