

ShopSphere

Shipping & Delivery Policy

Demo company knowledge document for the RAG customer-support chatbot.

1. Standard Delivery

The standard delivery estimate for eligible orders is 3 to 7 business days after the order has been processed.

The delivery estimate may vary based on destination, product availability, holidays, weather, carrier capacity, and other operational conditions.

2. Order Processing

Orders normally require processing before they are handed to the delivery carrier. Processing time may differ between products.

The estimated delivery date shown during checkout is the most relevant estimate for a specific order.

3. Tracking

After an order is shipped, customers can view tracking information from the Orders section when carrier tracking is available.

Tracking information may take some time to appear after the package is handed to the carrier.

4. Delayed Delivery

If a shipment is delayed beyond its estimated delivery period, the customer should check the latest tracking update and contact ShopSphere support if the status does not change.

A delayed shipment does not automatically qualify for a refund unless the order meets the conditions of the applicable cancellation or refund policy.

5. Delivery Attempt

The carrier may make multiple delivery attempts depending on the destination and carrier rules.

Customers should ensure that the delivery address and contact information provided with the order are accurate.

6. Undelivered or Returned Shipment

If a shipment cannot be delivered and is returned to ShopSphere, the order may be cancelled or refunded according to the applicable policy.

If the customer still wants the product, a new order may need to be placed after the original order is resolved.
